Abstract

This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.

Claim Rejections - 35 USC § 112

Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

i) Claim 1 reads “N-(3-rifamycinyl)-carbamates of the formula I”. Since this term is confusing and not fully descriptive, the language “A compound of formula I” is suggested. See also claim 7. Similarly, in claims 2-6, “A compound of formula I” is suggested in place of “Carbamates of claim 1.”

ii) In claim 1, line 3, the phrase “and their corresponding hydroquinones” is not proper Markush language. The phrase “or its corresponding hydroquinone” is suggested. See also claim 7. The last line of claim 1 should also be corrected to read “or a pharmaceutically acceptable salt thereof” because it appears that Applicants intend a pharmaceutical and in order to present the claim in proper alternative form.

iii) The term “comprising” in claim 1 is open-ended. The phrase “selected from the group consisting of” and insertion of “and” before the last substituent is suggested. See also claims 7, 16 and 18.

iv) The term “preferably” is improper in claims 2-5, 8 and 17 because it renders the claims indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Art Unit: 1624

v) In claim 16, Applicants should insert “pharmaceutical” to clearly set forth what kind of a composition is intended.

vi) The intended use of a pharmaceutical composition does not have patentability weight.

vii) A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by “such as” and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 18 recites the broad recitation “microbial infection with ordinary (non-mycobacterial) bacteria, and the claim also recites “mycobacterial infection” which is the narrower statement of the range/limitation.

viii) Regarding prevention of the infection, it is unclear who the subject is that needs prevention and how one can say whether the infection is prevented. Deletion of “preventing” is suggested.

Claims 10-15 provide for the use of a compound, but, since the claims do not set forth any steps involved in the method/process, it is unclear what method/process applicant is

Art Unit: 1624

intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claims 10-15 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd. App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).
